EDUCATION

Stanford University

Ph.D. in Psychology (expected 2019)

Advisors: Ellen M. Markman & Carol S. Dweck

Area of specialization: Developmental psychology

Yale University

B.A., *magna cum laude*, with distinction in Cognitive Science (2009)

RESEARCH INTERESTS

I study intuitive theories and conceptual change, with a focus on “folk philosophy of mind”—how children and adults come to understand things like mental life, sentience, and personhood. I am particularly interested in the ways that these conceptual representations do (and do not) vary across development, across cultural contexts, and across individuals. My research is grounded in theory and methods from developmental and cognitive psychology, but it is also informed by philosophy, anthropology, and cultural psychology, as well as recent advances in statistical modeling and computational cognitive science.
