EDUCATION

Stanford University, Stanford, CA

Ph.D. in Psychology (in progress: September 2013 – present)

Advisors: Ellen M. Markman, Ph.D., & Carol S. Dweck, Ph.D.

Area of specialization: Developmental psychology

Yale University, New Haven, CT

Bachelor of Arts, *magna cum laude*, with distinction in Cognitive Science (May 2009)

Cognitive Science Major: selective, self-designed major focusing on the concept of the self, with courses in psychology, philosophy, neuroscience, and linguistics

Directed Studies: selective 1-year program in Western literature, history, and philosophy

RESEARCH INTERESTS

I am interested in folk philosophy of mind and social cognitive development—specifically, how people come to understand mental life, sentience, consciousness, and personhood. Most of my work examines people's reasoning through behavioral studies with 3- to 12-year-old children and adults. I am also interested in examining the cultural forces that shape people's sense of what it means to be a person through mixed-methods, cross-cultural work and through detailed studies of cultural products (e.g., children's books). More broadly, I am interested in drawing connections between developmental, cognitive, social, and cultural psychology, as well as philosophy and anthropology.
